Tentative Agenda

Thursday, June 9

Topics in Acute Pancreatitis
Early Diagnosis and treatment of acute pancreatitis .............................................................. TBD
Surgery for Acute Pancreatitis: Is there still a Role? ..............................................................Kaysie Banton, MD
Critical Care of Severe Acute Pancreatitis ......................................................................... TBD
Endoscopic Interventions in early Acute Pancreatitis ........................................................ Martin Freeman, MD
Minimally invasive approaches to complicated acute pancreatitis – multidisciplinary approach ... Stuart Amateau, MD
Nutritional support in severe acute pancreatitis ................................................................-Julie Otteson, MD
Multimodality Care of Patients with Disconnected Duct Syndrome .................................. Rajeev Attam, MD
Imaging in Acute Pancreatitis ............................................................................................Eric Niendorf, MD

E. Starr Judd Lecture: Multicenter Randomized Trials in Pancreatic Surgery ......................... Marc Besselink, MD
Lunch: Videos related to Acute Pancreatitis Treatment

Future Trends: Translational Research, Premalignant Processes and the Pancreas ..........Moderator: Ashok Saluja, MD
Molecular Pathophysiology of Acute Pancreatitis ................................................................. Ashok Saluja, MD
Report on NIH Consortium on Pancreatitis .......................................................................... TBD
Opiates and Effects on inflammation in Pancreatitis ............................................................... Sabita Roy, PhD
IPMN and Cystic Neoplasm Classification ............................................................................J. Shawn Mallery, MD
Pancreatitis vs Pancreas Cancer: Targets for early detection and treatment ......................... Markus Lerch, MD
IPMN – When to Operate ..................................................................................................... Eric Jensen, MD

Case Studies in IPMN and Acute Pancreatitis (Controversies in Management)

Evening Program: Owen H. Wangensteen Research Lecture and Dinner
Causes and Mechanisms of Pancreatitis ............................................................................... Markus Lerch, MD

Friday, June 10

Morning Session
Chronic Pancreatitis: How to make the diagnosis ................................................................. TBD
Pancreaticogenic Diabetes – Pathophysiology and Management ...........................................Melena Bellin, MD
Autoimmune Pancreatitis – Indications, Diagnosis, Treatments and Complications .......... Suresh Chari, MD
Recurrent acute pancreatitis – pathophysiology and definitions .......................................... TBD
Endoscopic and medical therapies for chronic pancreatitis ................................................ Martin Freeman, MD
Diabetes and Pancreas Cancer: Implications for early diagnosis .......................................... Suresh Chari, MD
Surgical Management of Chronic Pancreatitis: Who, When, What and Where ...................... Marc Besselink, MD
Laparoscopic vs Open Approaches to Surgery of the Pancreas ........................................... Eric Jensen, MD

Case Studies in Chronic Pancreatitis
Lunch: Videos on Chronic Pancreatitis

Total Pancreatectomy and Islet Autotransplant
Optimizing Diabetes Outcomes after TPIAT ........................................................................ Melena Bellin, MD
It’s all about the Islets – Maximizing Yield, Lessons Learned ........................................... Josh Wilhelm, MS
Kids with Chronic Pancreatitis – When to Consider TPIAT .................................................. Srinath Chinnakotla, MD
Pain and Suffering – How to Alleviate .................................................................................. Florin Orza, MD
Indications for TPIAT – the Minnesota Experience and Beyond ......................................... Greg Beilman, MD
Laparoscopic vs Open Surgery for TPIAT ............................................................................ Ty Dunn, MD

Simulated Wednesday Conference
Curriculum and faculty are subject to change.
