Providing the best surgical, medical and rehabilitative care for our elder fracture patients is a challenge and an opportunity. Attend the 2020 Geriatric Orthopedic Fracture Conference and learn novel and evidence-based strategies for meeting these challenges. The conference, in its ninth year, will provide up-to-date information and tools for effective collaboration among providers whose elder patients have sustained a fracture. Fracture prevention, osteoporosis evaluation and treatment, and rehabilitation issues will be addressed. The conference format will be interactive and will include large and small group sessions as well as a patient panel and a multi-media presentation of recommendations and tips from geriatric orthopedic specialists from around the world!

**Keynote Address**  
Pierre Guy, MD, MBA, FRCSC  
Dr. Pierre Guy is Associate Professor and clinician-scientist at University of British Columbia Department of Orthopaedics and of the Division of Orthopedic Trauma. He is the Co-Director of UBC`s Centre for Hip Health and Mobility. Dr. Guy’s research is focused on hip fracture prevention, treatment and post injury function and pelvis /acetabulum fractures.

**Learning Objectives**
- Identify current guidelines to provide optimal osteoporosis treatment for elderly patients following fracture and prior to elective orthopaedic procedures.  
- Identify current algorithms for pain management in older patients post-fracture.  
- Identify collaborative strategies for disparate specialties to work together.
